## HARDY GARDEN CHRYSANthemums

### CHRYSANthemum (Kris-an'-the-mum)

Chrysanthemums have no equal as cut flowers. The early sorts will give good blooms by the first of July and by a judicious choice of types you may have bloom until actual freezing weather. Many sorts are impervious to light frosts. Give plenty of moisture in full sun and fertilize heavily. Three or 4 inches of barnyard manure should be spaded into the soil before planting is done. A teaspoonful of bone meal and another of superphosphate may be put in the bottom of the hole when plant is set out. A monthly feeding of some good commercial fertilizer will give exhibition blooms.

**WINTER PROTECTION**—The best winter protection is nature's own. In other words their own tops. Never cut the old plants down in the fall. If further protection is desired use excelsior or evergreen boughs. Never use leaves, straw or other material that will smother the young new growth.

### NEW EARLY FLOWERING ENGLISH CHRYSANthemums

If disbudded these new sorts will make flowers from 5" to 6" across. If not disbudded the blooms will be larger than any other garden varieties. They also have the habit of early blooming which makes them doubly valuable for garden use.

PYRETHRUM—PAINTED DAISY

**PYRETHRUM (Py-ree'-thrum)—Painted Daisy**

Pyrethrums have been called the spring blooming Chrysanthemum and we think that the newer sorts are a very close rival of that popular flower. As a cut flower for Memorial Day they certainly have no superior. If not allowed to seed there will be scattered blooms all summer, although these as well as the first flowers after transplanting, are apt to be single. All are propagated vegetatively and are guaranteed true to name.

**PRIMULA AURICULA—Evergreen Primrose**

In the Auricula we have a primrose that may be grown with no protection whatever in any part of the country. The broad fleshy leaves are evergreen and may often be seen encased in ice in our beds but when the ice is gone they are as firm as ever. In some varieties the leaves are coated with a silvery bloom that adds greatly to their charm. The sweetly scented flowers come in a wide range of colors. They bloom both spring and fall, asking only a rich, moist soil in sun or shade. A situation affording light shade from the noon-day sun suits them best. PRIMROSE JULIAE HYBRIDS

## PRIMULA—*Juliae* Hybrids

In all the spring garden there is nothing, in our estimation, that makes quite the brilliant splash of color as does this fine group of plants. The beautiful evergreen foliage is almost completely hidden by the masses of flowers that appear as soon as the snow leaves us. They are as hardy as a Lilac bush and increase with unbelievable rapidity.

They are the result of crosses of the hardy species *Juliae* and various other forms of Primulas. Therefore, some are acaulis type and others polyantha, but all are utterly lovely. Some even give us a good show again in the fall. No garden, large or small, should be without a good collection of this impressive family. Grow them in that shady spot where nothing seems to do well.

## Fantail Pigeons

### LIVE ORNAMENTS FOR YOUR GARDEN

Nothing is more lovely than these beautiful birds strutting about a garden. They are as proud as peacocks of their huge, beautiful tails and fairly quiver with excitement as they strut about. Their soft cooing is always delightfully soothing, and as they are not very strong flyers, due to the weight of the heavy tail, they are always close to their home which can be regulated at will. An artistically built dove cote atop a post, or a shelf placed inside an out building with a small hole cut through to let them in and out will do nicely. We can supply black, blue, red, silver, white, and mixed colors at \$5.00 a pair. Saddles \$7.50 a pair. For specimen birds write for prices.

This year we are growing about 400 varieties of Tall Bearded Iris, including many new ones. The first week in June is the best time to see these. In the fall we will have about 300 varieties of the finest Chrysanthemums in flower. The public is cordially invited to visit these displays at any time.
